PROFESSIONAL SUMMARY

Software Engineer fresher B.E. Computer Science & Design with a strong foundation in Data Structures & Algorithms, OOP, SOLID principles and system design basics. Built distributed, event-driven microservices with Spring Boot and a multi-role MERN platform, and integrated AI features through the API. Focused on writing clean, tested, maintainable code and solving real-world problems at scale. Seeking an entry-level Software Engineer role in a collaborative engineering team.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL.

Frontend: React.js, React Router, HTML5, CSS3, Bootstrap, Axios, Responsive Design.

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring Cloud (Gateway, Eureka), Node.js, Express.js, REST APIs.

Architecture & Security: Microservices, Event-Driven Architecture, JWT, Keycloak (OAuth2/OIDC), RBAC.

Databases & Messaging: MySQL, PostgreSQL, MongoDB, RabbitMQ.

Tools & Testing: Git, GitHub, Maven, Docker (basics), CI/CD, Postman, JUnit, Mockito, End-to-End Testing, Debugging.

AI: API Integration, AI-Assisted Development, Responsible AI.

Core CS: Data Structures & Algorithms, OOP, SOLID, Exception Handling, DBMS, Operating Systems, Computer Networks.

PROJECTS

FiTracker — AI-Powered Distributed Tracking Platform

Mar 2026 – Apr 2026

Spring Boot, Spring Cloud, RabbitMQ, React.js, PostgreSQL, MongoDB, Keycloak, Gemini API

- Architected a fault-tolerant microservices platform using Spring Cloud Gateway and Eureka with a database-per-service design, enabling independent and scalable deployment.
- Integrated Keycloak (OAuth2/OIDC) for centralized authentication and role-based authorization, reducing duplicated auth logic across services by nearly 70%.
- Replaced synchronous REST calls with RabbitMQ event-driven communication, improving throughput and decoupling services under concurrent load.
- Integrated the Google Gemini API for AI-powered health insights and managed centralized configuration with Spring Cloud Config Server.

DutyFixIt — Service Booking Platform

Nov 2025 – Jan 2026

React.js, Node.js, Express.js, MongoDB | Final Year Project

- Built a multi-portal application for Client, Worker and Admin workflows with role-based access control.
- Designed and developed 10+ RESTful APIs for booking, authentication and user management following REST principles.
- Implemented dual-token JWT authentication with silent refresh using Axios interceptors for uninterrupted user sessions.
- Optimized MongoDB aggregation pipelines and indexing, reducing database read operations by over 60%.

EXPERIENCE

Web Developer Intern — Xplo Code Pvt Ltd, Madurai

May 2025 – Jun 2025

- Converted UI/UX wireframes into responsive, interactive front-end components using HTML5, CSS3 and JavaScript, improving cross-device accessibility.
- Improved page load speed through semantic HTML and clean, optimized CSS.
- Worked in an Agile team using Git for version control and delivered milestones on schedule.

EDUCATION

B.E., Computer Science & Design — Sethu Institute of Technology, Virudhunagar

2022 – 2026

CGPA: 7.1 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Java Programming — Intellipaat
- Introduction to Generative AI & Responsible AI Principles — Google Cloud
- TCS National Qualifier Test (NQT) 2026 — Overall 69.18% (2075.26/3000); Foundation Section 74.21% (1335.72/1800)
